BACHMANN
QUALITY SINCE 1833

# 2022

We're excited to start 2022 with the arrival of our HO scale Siemens ALC-42 Charger, decorated in the Amtrak® Phase VI scheme (pictured on the front cover) and as a limited edition model in the one-off "Day 1" heritage scheme. This model has been developed with Siemens alongside the real locomotives, which will be entering service on long-distance trains as the year progresses. We're also taking this opportunity to announce our addition of the VIA Rail Canada™ SC-42 Charger to the line. Both models feature the same function-packed TCS WOWsound® system found on our SC-44 Charger, which includes CD-quality audio and a Keep Alive® device to ensure smooth operation.

Also on the cover, we're pleased to introduce our new Concrete Tie *E-Z Track*® - the perfect solution for modeling modern, high-speed mainlines, be it the Northeast Corridor or the BNSF Transcon over Cajon Pass. Featuring both 18" and 22" Radius Curves, a 9" Straight Terminal Rerailer with modern grade crossing texture, #4 Turnouts, and a Hayes Bumper, this range sets the stage for fast mainline action.

Our new *Amtrak® City Sprinter* HO scale train set features the popular ACS-64 electric. With three lighted Amfleet® cars and a wide oval of new 22" radius Concrete Tie *E-Z Track*®, you can recreate the thrill of high-speed passenger railroading in miniature. For modelers who favor steam, our *Daylight Special* is ready for service. Featuring a powerful Southern Pacific™ GS-4 locomotive and three Smooth-Side lighted cars, this set will transport you to the era of streamlined transportation. With classic Boy Scouts of America® artwork, our *BSA® All American* is the perfect gift for any budding scout, and our *Norman Rockwell Christmas Express* is sure to inspire holiday joy, adorned with iconic Normal Rockwell works and led by a festive 0-6-0 locomotive.

In N scale, we're introducing two locomotives which both, in their time, have been emblematic of advanced passenger railroading technology; the PRR Streamlined K4, and the Siemens SC-44 Charger. The K4 features a die-cast metal boiler for an authentic scale weight and feel, and comes equipped with directional lighting and Soundtraxx™ Sound Value DCC. Our N scale SC-44 Charger includes TCS WOWsound® and a Keep Alive® device for smooth, continuous operation. Also arriving in N scale; our *Keystone* set is the perfect introduction to model railroading, with a Prairie steam locomotive and freight consist featuring a variety of authentic paint schemes.

In On30, we've added a great selection of rolling stock items to expand your collection. From new "Gondola Style" excursion cars, painted for real-world narrow gauge railroads, to 2-bay hoppers and wood-side cabooses, these highly detailed *Spectrum*® items will be a welcome addition to any On30 layout.

In Large Scale, we're continuing to expand our range of 1:29 scale models. This year will see the introduction of our 53' Evans Boxcar featuring a flashing LED "End of Train" device. These will look excellent alongside our upcoming Dash 9 and will provide an authentic "last car" for modern freight consists.

Lastly, Williams by Bachmann welcomes new additions to the growing *E-Z Street*® range of road vehicles with a series of new delivery vans, and is shipping the latest Quad Hoppers and Eggliners.

While we've highlighted many exciting additions here, we've got a whole lot more packed in this catalog. Be sure to look out for new paint schemes and road number announcements for a wide range of locomotives, rolling stock items, and much more. As always, Bachmann offers plenty of options for beginners, advanced modelers, and everyone in between in 2022.

Bachmann is proud to honor one of America's most beloved artists, Norman Rockwell, with the *Norman Rockwell Freedom Train*. In 1941, U.S. President Franklin D. Roosevelt addressed Congress with his hopes for America after World War II, emphasizing a vision of four basic freedoms: freedom of speech, freedom of worship, freedom from want, and freedom from fear. Rockwell painted each of these freedoms as part of his desire to do more for the war effort, naming the series the *Four Freedoms*. This artwork would help elevate Rockwell to an icon of American culture after being printed in *The Saturday Evening Post*. In May of 1943, Rockwell joined a combined campaign by the *Post* and U.S. Department of the Treasury to sell war bonds and stamps through a travelling rail exhibit. Every citizen who bought war bonds through the campaign received printed copies of the *Four Freedoms* in return. *The Freedom Train*, adorned in a patriotic red, white, and blue paint scheme, rode the rails from September of 1947 to January of 1949 to 16 U.S. cities highlighting American heritage and the importance of preserving important American documents. 133 items in total were featured on the train, including Rockwell's *Four Freedoms* and original versions of the United States Constitution and Declaration of Independence. The classic artwork's next stop is your HO scale layout, where Bachmann's *Norman Rockwell Freedom Train* embodies the same hopeful message of its namesake.

**FT LOCOMOTIVE (*TCS DCC SOUND VALUE-EQUIPPED*)**
Performs best on 18" radius curves or greater.

Suggested price: $315.00 each

The FT locomotive, produced by EMD beginning in the late 1930s, is credited by historians as one of the most important locomotives of all time. The first of EMD's widely popular F-series diesel locomotives designed for freight service, it was successful in convincing rail systems across the United States that diesel locomotives were the future of rail travel and worthy of replacing long-used steam locomotives. Bachmann's HO scale locomotive features a TCS Sound Value decoder with a Keep-Alive® device for uninterrupted operation, even over dirty track. Arriving set for maximum realism, the FT's Sound Value diesel locomotive package includes an EMD 567A prime mover sound set with choice of 8 horns and 5 bells, plus dynamic brakes, automatic air compressor and air spitter valve, windshield wiper, brake squeal, cooling fans, coupler clank, grade-crossing quill, and all directional quills.

***Additional features include:***

- DCC sound-equipped for sound, speed, direction, and lighting control
- Keep-Alive® device that keeps your engine running during power interruptions due to dirty track or loss of electrical contact
- dual-mode NMRA-compliant decoder
- function pagination feature for expanded function control with Bachmann's *E-Z Command*® system
- operating headlight
- can motor
- all-wheel drive
- RP25 wheel contours
- *E-Z Mate*® Mark II couplers

Price to be announced

Manufactured between 1949 and 1954, the GP7 was EMD's first successful diesel road switcher. 2,729 units were constructed over a five-year period, with EMD barely managing to keep up with demand. The type would set the stage for EMD to become one of the most successful locomotive manufacturers of the latter half of the 20th century, and despite their age, many remained in service well into the 1980s. Now in their 7th decade, a selection of examples continue to find use on short lines and tourist railroads to this day. Our GP7 comes with directional lighting and a factory-installed 8-pin socket for the DCC decoder installation of your choice.

**380-TON SCHNABEL CAR with RETORT/CYLINDER LOAD**
***(North American style)***
32.5" long; performs best on 22" radius curves or greater.

Suggested price: $349.00 each

The Schnabel car's unique design allows it to carry extremely heavy or oversized loads, such as generators and transformers for power stations, by making the load an element of the car. The two tapered lifting arms that hold the load resemble a bird's beak, which gave the car its name—*Schnabel* is from the German for "carrying-beak-wagon" (*Tragschnabelwagen*). Schnabel is a funny name for a seriously powerful freight car.

***Features include:***
- 16 sets of 125-ton roller-bearing trucks
- prototypically correct 36" metal wheels
- RP25 wheel contours
- 8 span bolsters
- detailed retort/cylinder load
- molded hydraulic lines and pumps

**BRITISH BRAKE VAN TRACK CLEANING CAR**
*with international style hook-and-loop couplers*

The car's exclusive dry cleaning system features a reusable track cleaning pad to keep your rails shining and your operation trouble-free.

BACHMANN E-Z MATE® COUPLERS FOR THE 21ST CENTURY

## *Magnetically Operated Knuckle Couplers*

*E-Z Mate*® couplers make use of precision molding techniques to allow the molding of springs as an integral part of the knuckle coupler; *E-Z Mate*® Mark II couplers include an integrated metal coil spring. *E-Z Mate*® and *E-Z Mate*® Mark II couplers eliminate the problems and expense associated with separate coil springs.

To install *E-Z Mate*® and *E-Z Mate*® Mark II couplers, just remove the coupler pocket cover, drop in the coupler, and replace the cover. Operation is simple as well; *E-Z Mate*® and *E-Z Mate*® Mark II couplers operate with a standard metal "glad hand" and under-track magnet, and they are completely compatible with all magnetically operated knuckle couplers currently on the market. (Our under-track magnet comes with a trackside brakeman figure to indicate the magnet's position.) Coupling, uncoupling, and other yard operations are all performed with ease.

The East Broad Top Railroad and Coal Company began operation in 1872 to mine and transport coal from the Broad Top Mountain in central Pennsylvania. When the mines closed in 1956, the railroad was purchased by a company which operated a small section of the line for tourist excursions. The EBT railroad held the distinction of the only original narrow-gauge railroad surviving east of the Rocky Mountains for much of its history until the railroad ceased operations in 2011. Steam locomotives will once again head down the tracks in 2022 as the railroad returns to service with passenger excursions. Bachmann is happy to celebrate the history and revival of the East Broad Top with this freight train set. The set arrives complete with a 2-6-0 locomotive with operating headlight and tender with coal load, tank car, two-bay steel hopper, and caboose. Also included is a 56" x 38" oval of snap-fit nickel silver *E-Z Track®*, magnetically operated *E-Z Mate®* couplers on all cars, power pack and speed controller, and illustrated instruction manual.

**2-6-2T BALDWIN CLASS 10 TRENCH STEAM ENGINE (*DCC WOWSOUND®-EQUIPPED*) FEATURING CHUFFINITY™ TECHNOLOGY**

Performs best on 18" radius curves or greater.

Suggested price: $469.00 each

Quickly created narrow gauge railroads played a crucial role in bringing food, ammunition, and construction material to entrenched troops and carrying away injured soldiers from the Western Front in World War I. The Baldwin Class 10 Trench 2-6-2T was one of the locomotives that saw service with the U.S. Army in France. When the war ended, the victorious U.S. troops turned over all the railways and equipment to the French, who adapted them for agricultural use. Bachmann's DCC WOWSound®-equipped model is the first ever to feature Chuffinity™ technology. With a ten-fold increase in the number of chuff sounds over previous WOWSteam offerings, Chuffinity™ creates amazingly diverse and realistic sounds. Coupled with intelligent load and grade sensing, chuffs will vary in character, volume, and intensity in prototypical fashion. Chuffinity™ is just part of this Trench engine-specific WOWSound® steam locomotive sound package that also features depot background and battleground sounds. This DCC sound-equipped Trench engine will put you in the middle of all the action of the Great War!

## O SCALE
## *PLASTICVILLE® U.S.A.* KITS

Since 1947, hobbyists and collectors have made *Plasticville® U.S.A.* products their structures of choice. *Plasticville®* pieces add character and dimension to your O scale layout. Many buildings and accessories have been added to the *Plasticville®* line throughout its history, and many are still produced from their original molds. As a fun challenge to collectors, you can collect hundreds of product, color, and packaging variations that have occurred over the years (you can even join the independent Plasticville Collectors Association at plasticvilleusa.org). Whether you're new in town or an established civic leader, Bachmann builds *Plasticville® U.S.A.* for you. City growth is limited only by your imagination!

Imagine living in a rural town in the early 1900s and seeing a circus train arrive at your railroad station. A powerful steam engine would be pulling car after colorful car, some filled with exotic animals you'd never seen, such as lions, tigers, and elephants! While many circuses were able to expand because of the efficiency of rail transportation, it was only the merger of Ringling Brothers and Barnum & Bailey in 1919 that created a colossal train of over 90 cars! For nearly 100 years *The Greatest Show on Earth*™ traveled by rail to thrill millions of circus-goers all across the country. Bachmann is delighted to bring you these vintage *Ringling Bros. and Barnum & Bailey*™ models that let you experience all the excitement of the *Ringling Bros.*® train coming to town!

Now your model town or city can get moving with the *E-Z Street*® track system and *E-Z Street*® vehicles. The *E-Z Street*® modular system snaps together to create realistic one-lane or two-lane roads and intersections. Some suggested configurations include using four sections of 90 Degree Crossover Track (Item No. 00268) to form a two-lane four-way intersection. The 16" diameter curves (Item No. 00261) nest inside the 21" diameter curves (Item No. 00262) for realistic two-lane roads. When planning your track layout, note that you need to use 2.5" Straight to Curve Track (Item No. 00264) anytime you want to connect straight track (5" Straight, Item No. 00266 or 10" Straight, Item No. 00267) to a curved section.

To add power to your *E-Z Street*® system, you must connect Power Wires (Item No. 00270) to the underside of a section of 10" Straight Track (Item No. 00267). If you would like to create an urban siding off of your track mainline, use our "To Track" Connector Pins (Item No. 00272) to connect to our O Gauge or O-27 tubular track system.

From open rural highways to busy city downtowns, *E-Z Street*® offers limitless possibilities for fun!
